EMPOWER. EVOLVE. EXCITE.

easyExpand the functionality of your current eProductivity Software Enterprise Commercial Print Suite system with the sales tax automation solution of Thomson Reuters ONESOURCE™.

Gain greater control over your financials, better manage operations, and make informed decisions to drive business success.

SUITE EPRODUCTIVITY SOFTWARE MONARCH'S ONESOURCE™ TAX CONNECTOR

ConnectorThe ONESOURCE™ Tax Connector is used in conjunction with Thomson Reuters' third-party tax determination service, ONESOURCE™. This connector allows the Accounts Receivable Invoices module to precisely calculate sales tax on invoices using the addresses of job shipments and sales categories from the product(s) contained in the shipments.

The connection facilitates communications between Monarch and the ONESOURCE™ tax determination service. As invoices are created, Monarch calls ONESOURCE™ that sends the addresses and sales categories from eligible job shipments to the tax determination service. ONESOURCE™, in turn, uses this information to provide the appropriate tax rate and tax amount for the tax distributions that are then added to the invoice.

When it's time to post the invoices, the pertinent information is sent to ONESOURCE™ to be stored for later tax compliance reporting.

Thomson Reuters ONESOURCE™ Determination offers a comprehensive, cloud-based tax automation solution that connects with the eProductivity Software ERP/MIS systems to help you eliminate the complexities of tax compliance and effortlessly navigate the ever-changing tax landscape.

As an end-to-end solution, ONESOURCE™ Determination accounts for every step of the transactional tax lifecycle — from managing exemption certificates, to rate calculation and rules, to reporting and returns — so you can say goodbye to manual work and focus more on growing your business.

KEY BENEFITS

Automated

- End-to-end sales tax automation across your business
- Removes manually updating sales tax rates with built-in, continuously updated, certified tax research delivered automatically
- Works behind the scenes with no disruption to user experience or workflows

Flexible

- Scales to support business growth
- Offers enterprise-grade configurability to meet the specific tax needs of your company
- Connects easily with your other business systems, like MarketDirect StoreFront, enabling company-wide tax automation

Reliable

- Built following ONESOURCE™ development best practices to assure superior compatibility and functionality
- Maintains the most extensive coverage of tax content with rates for more than 16,000 jurisdictions and over 8,000 product categories
- Reduces risk to projects and ongoing operations with expert-led implementation and support

Prerequisites

eProductivity Software Enterprise Commercial Print Suite 7.1 (Monarch v18.2) or above.

The ONESOURCE™ Tax Calculator Connect must be purchased and licensed through your EFI SDM.

The ONESOURCE™ Tax Service needs to be purchased through your Thomson Reuters ONESOURCE™ sales rep: +1-800-865-5257.

FEATURES

ONESOURCE™ Determination enables companies to extend the functionality of their ERP/MIS software to handle every step of the sales tax journey from tax calculation to signature-ready returns.

This powerful integration delivers the SaaS capabilities users expect plus the robust features more than 10,000 companies rely on globally.

TRUSTED TAX RESEARCH

Automatic tax rate updates for more than 16,000 tax authorities globally backed by an internal team of tax research experts.

PRODUCT TAXABILITY

Specific taxability codes can be mapped to millions of products and services with the click of a mouse.

DYNAMIC REPORTING

Pre-defined and customizable reports plus signature-ready returns make for easy filing and audit defense.

TAILOR TO YOUR NEEDS

Advanced configuration capabilities can make allowances for global workflow rules, and system data adjustments.

eProductivity Software is a leading global provider of industry specific business and production software technology for the packaging and print industries.
