## Customization

**Full customization**

Pace's customization toolkit allows you to edit and extend every database object. Includes robust options for tailored reports.

**Limited Customization**

Competitors do not offer this level of flexibility and adaptability, limiting your ability to tailor the system to your specific needs.

## API

### Greater API Functionality

Pace API shines with advanced functionality, superior integration, and a broader feature set, offering adaptability and a competitive edge.

### Limited API

Competitors' APIs are limited to updating production status, lacking features like user or customer creation.

## Report Queries

### Built-in Reporting

PaceStation offers comprehensive reporting and system-wide query capabilities for enhanced functionality.

### Expensive

Competitors offer reports, but they come at an additional cost for comprehensive reporting features and customization options, impacting your overall budget.

## Production Visibility

### Insight with Workbench

Bundled with Pace, Workbench offers personalized user views. Enhance your insights by incorporating charts and graphs, bringing your data to life!

### Billable

Competitors charge additional costs as customization in their systems necessitates a systems administrator.

## Accounting Capabilities

### Integrated Accounting

Pace's integrated accounting streamlines financial management, handling expenses, revenue, and overall financial health alongside your print operations.

### Limited Capability

Competitors provide limited accounting capabilities, lacking the comprehensive financial management integration found in Pace.

## Shipping Rate Quotes

### Accurate shipping rate calculations

Instantly access rapid multi-carrier quotes using ePS Process Shipper, providing precise rate quotes based on your package weight and dimensions.

### Imprecise

Competitors frequently offer imprecise and overly broad shipping estimates, leading to potential inaccuracies
